Attendance is complimentary for qualified attendees

ABOUT THE FORUM

Please join Capital Link's 11th Annual International Shipping & Offshore Forum on Monday, March 20, 2017 at The Metropolitan Club in New York City.

This Forum is organized in partnership with Citi and in cooperation with the New York Stock Exchange and NASDAQ. The event is known for its large attendance by investors, owners and financiers. Held in New York City every year, the Forum examines the macroeconomic issues that are shaping and transforming the international shipping and offshore markets today. It provides a comprehensive review and outlook of the various shipping and offshore markets, made more relevant by the release of companies' annual results. In addition, it discusses topics of critical relevance to the industry such as, such as restructuring and consolidation, the various channels and methods of raising capital as well as the impact of new technologies and trading routes.

KEYNOTE SPEAKERS

Commissioner **Mario** Cordero of Federal Maritime Commission

Mr. Peter Evensen. Former President and **CEO Teekay** Corporation

Capital Link Shipping Leadership Award

After the luncheon, the "2017 Capital Link Shipping Leadership Award" will be presented to Mr. Richard T. du Moulin, President of Intrepid Shipping and the Former Chairman of Intertanko in recognition of his unique and extensive contribution to the shipping industry.

Introductory Remarks by

Mr. C. Sean Day, Director and Chairman - Teekay Corporation

Capital Link Invest in Cyprus Forum Wednesday, March 22, 2017

The Metropolitan Club, One East 60th St., New York City

REGISTER

AGENDA

ADD TO OUTLOOK

ABOUT THE FORUM

Capital Link's Invest in Cyprus Forum will take place on Wednesday, March 22, 2017 at the Metropolitan Club in New York City.

We are particularly proud to inaugurate the Capital Link Invest in Cyprus Forum which we plan to repeat annually. The Forum aims to raise awareness of Cyprus as an investment and business destination among the US investment, financial and business communities. It will showcase the increasing importance of Cyprus as a regional maritime, logistics, energy and operational hub and highlight investment and business opportunities in these areas as well as in financial services, IT and tourism.

Cyprus can be of significant value to companies which are using the United Kingdom as a gateway to the European Union and will thus be affected by BREXIT. Strategically located as the gateway to the European Union, the Middle East, North Africa and the Black Sea, Cyprus is a full member of the European Union with an open market economy and skilled workforce mainly specializing in the financial and service sectors. It offers political stability, an efficient legal system, a competitive tax regime and a restructured and growth oriented economy. The banking system has been recapitalized and is governed by practices aligned with the EU legislation.

The conference will feature the developments and reforms in the Cypriot economy and the Cypriot government's programme for the economy and investments. It will highlight investment and business opportunities in key areas such as banking and financial services, shipping and transportation, logistics, energy, IT and tourism.

The conference will feature political and business leaders and decision makers from the public and private sectors, including the President and three key Government Ministers from the Republic of Cyprus, the CEOs of major Cypriot organizations and senior executives of US and international companies active in the region.

Capital Link remains committed to its aim of raising awareness about Cyprus as an investment destination to a wider investor audience. This Forum will provide the audience with a unique blend of informational, marketing and networking opportunities.

PANEL TOPICS TO BE COVERED

- The Emergence of Cyprus As A Regional Business
- The Economy of Cyprus Developments & Outlook
- Cyprus: A Dynamic Business and Investment Centre
- Doing Business in Cyprus Legal and Tax Considerations
- Cyprus: Growth Opportunities in the Financial Sector and Beyond
- Banking & Financial Services
- Developing the Fund Industry Through Cyprus -

- Cyprus as the Gateway to the European Union
- Cyprus as a Regional Energy Hub Investment & **Business Opportunities in Energy**
- Cyprus as a Regional Banking and Financial Services Hub
- Why Cyprus The International Investor Perspective
- Why Cyprus The Cypriot American Perspective
 - Investing in Growth & Entrepreneurship -International Funding Mechanisms for SME Investments in Cyprus

...Linking Shipping and Investors Across the Globe

Capital Link is a New York-based Advisory, Investor Relations and Financial Communications firm. Capitalizing on our in-depth knowledge of the shipping industry and capital markets, Capital Link has made a strategic commitment to the shipping industry becoming the largest provider of Investor Relations and Financial Communications services to international shipping companies listed on the US and European Exchanges. Capital Link's headquarters are in New York with a presence in London and Athens.

Investor Relations & Financial Advisory

Operating more like a boutique investment bank rather than a traditional Investor Relations firm, our objective is to assist our clients enhance long term shareholder value and achieve proper valuation through their positioning in the investment community. We assist them to determine their objectives, establish the proper investor outreach strategies, generate a recurring information flow, identify the proper investor and analyst target groups and gather investor and analyst feedback and related market intelligence information while keeping track of their peer group. Also, to enhance their profile in the financial and trade media.

In our effort to enhance the information flow to the investment community and contribute to improving investor knowledge of shipping, Capital Link has undertaken a series of initiatives beyond the traditional scope of its investor relations activity, such as:

www.CapitalLinkShipping.com

A web based resource that provides information on the major shipping and stock market indices, as well as on all shipping stocks. It also features an earnings and conference call calendar, industry reports from major industry participants and interviews with CEOs, analysts and other market participants.

Capital Link Shipping Weekly Markets Report

Weekly distribution to an extensive audience in the US & European shipping, financial and investment communities with updates on the shipping markets, the stock market and listed company news.

www.CapitalLinkWebinars.com

Sector Forums & Webinars: Regularly, we organize panel discussions among CEOs, analysts, bankers and shipping industry participants on the developments in the various shipping sectors (containers, dry bulk, tankers) and on other topics of interest (such as Raising Equity in Shipping Today, Scrapping, etc).

Capital Link Investor Shipping Forums

In New York, Athens and London bringing together investors, bankers, financial advisors, listed companies CEOs, analysts, and shipping industry participants.

www.MaritimeIndices.com

Capital Link Maritime Indices: Capital Link developed and maintains a series of stock market maritime indices which track the performance of U.S. listed shipping stocks (CL maritime Index, CL Dry Bulk Index, CL Tanker Index, CL Container Index, CL LNG/LPG Index, CL Mixed Fleet Index, CL Shipping MLP Index – Bloomberg page: CPLI. The Indices are also distributed through the Reuters Newswires and are available on Factset.

DHT HOLDINGS, INC. ANNOUNCES FINANCING OF VLCC NEWBUILDINGS

DHT Holdings, Inc. (NYSE:DHT) ("DHT") announced that it has secured bank financing for the two 318,000 dwt VLCCs newbuildings scheduled to be delivered in July and September 2018 from Hyundai Heavy Industries. The financing will cover about 50% of the contract price with the remainder being financed by cash at hand. As such, DHT does not intend to issue any stock to finance the two newbuildings. The financing has a 5 year tenor and its 20 year repayment profile is in support of DHT's low cash break-even levels. DHT estimates that the average cash break-even for each vessel to cover OPEX, interest and debt repayment to be about \$16,800 per day. The bank financing has a margin of 250bps above LIBOR and 50% of the financing is structured as a revolving credit facility. http://www.dhtholdings.com/index.php?id=441&pressrelease=20834

07.html KNOT OFFSHORE PARTNERS LP ANNOUNCES COMPLETION

KNOT Offshore Partners LP (the "Partnership") (NYSE:KNOP)

OF THE ACQUISITION OF TORDIS KNUTSEN

4

IN THE NEWS

Latest Company News

announced today that it has completed its acquisition of the ownership interests in the company that owns and operates the shuttle tanker Tordis Knutsen (KNOT Shuttle Tankers 24 AS "KNOT 24") for an aggregate purchase price of \$147.0 million less \$137.5 million of outstanding indebtedness plus approximately \$21.1 million for a receivable owed by Knutsen NYK to KNOT 24 (the "Receivable") and approximately \$0.8 million for certain capitalized fees related to the financing of the Tordis Knutsen. On the closing of the acquisition, KNOT 24 repaid approximately \$42.8 million of the indebtedness, leaving an aggregate of approximately \$94.9 million of debt outstanding under the secured credit facility related to the vessel. The purchase price was settled in cash and will be subject to certain post-closing adjustments for working capital and interest rate swaps. On the closing of the acquisition, Knutsen NYK repaid the Receivable in full.

NAVIGATOR HOLDINGS LTD. ANNOUNCES RESULTS FOR THE THREE AND TWELVE MONTHS ENDED DECEMBER 31, 2016

- Navigator Holdings Ltd. (NYSE: NVGS) reports operating revenue of \$75.5 million for the three months ended December 31, 2016. Operating revenue amounted to \$294.1 million for the full year ended December 31, 2016.
- Net income was \$7.6 million for the three months ended December 31, 2016. Net income was \$44.6 million for the year ended December 31, 2016.
- Earnings per share was \$0.14 for the three months ended December 31, 2016 and \$0.81 for the full year ended December 31,
- EBITDA(1) was \$33.8 million for the three months ended December 31, 2016 and \$140.2 million for the year ended December 31, 2016.
- We took delivery of four newbuilding vessels during 2016, increasing our fleet to 33 vessels on the water as at December 31, 2016. In 2017 we have taken delivery of an additional two newbuildings, with the three remaining newbuildings expected to be delivered by July 2017.
- In October 2016, we entered into a new \$220.0 million secured term loan and revolving credit facility, to refinance two loan facilities that were due to mature in April 2017, and to provide the finance for our final unfinanced newbuilding.
- In February 2017, two of our original ethylene carriers were placed on long-term time charters that will commence in either late 2017 or early 2018 with Braskem SA. These vessels will transport ethane from Enterprise Product Partners, Morgan's Point Terminal, in the Houston Ship Channel to the Braskem ethylene complex in Brazil.
- In February 2017, we successfully issued \$100.0 million in new 7.75% senior unsecured bonds maturing in 2021 in the Norwegian bond market. The net proceeds and cash on hand were used to repay all of our outstanding \$125.0 million aggregate principal amount of 9% senior unsecured bonds that were due to mature in December 2017.

DRYSHIPS EXERCISES SECOND OPTION TO ACQUIRE A VERY LARGE GAS CARRIER WITH A 5 YEAR TIME CHARTER ATTACHED TO AN OIL MAJOR

DryShips Inc. (NASDAQ:DRYS) (the "Company"), a diversified owner of ocean going cargo vessels, announced today that it has exercised its second option under the previously announced option agreement to acquire up to four Very Large Gas Carriers ("VLGCs") currently under construction at Hyundai Heavy Industries Co., Ltd. ("HHI") for a purchase price of \$83.5 million. Part of the purchase price (approximately 25%) will be paid on closing, expected within March 2017, with the balance payable in installments until the vessel's delivery from HHI. The VLGC will be employed on a fixed rate time charter with five years firm duration to an oil major. The charterer has options to extend the firm employment period by up to three years. The Company expects the total gross backlog associated with this time charter to be \$54.0 million, or \$92.7 million including the optional periods, and expects to take delivery of the vessel in September 2017.

Shipping Equities: The Week in Review

SHIPPING EQUITIES OUTPERFORMED THE BROADER MARKET

During last week shipping equities though netting a positive return, narrowly overperformed the broader market, with the Capital Link Maritime Index (CLMI), a composite index of all US listed shipping stocks, up 0.76%, compared to the S&P 500 which increased 0.81%, Nasdaq up 1.19%, and Dow Jones Industrial Average (DJII) also up 0.99%.

Mixed Fleet stocks lead the strongest performers, with Capital Link Mixed Fleet Index (CLMFI) up 1.26% from the previous week, outperforming the broader market. Conversely, Dry Bulk equities were the weakest performers during last week, with Capital Link Dry Bulk Index (CLDBI) down 3.07%.

Along with the Dry Bulk Equities dropping 3.07%, both the Capital Link Tanker (CLTI) and Container (CLCI) Indices saw losses this week of 0.29% and 0.93% respectively.

The Baltic Capesize Index saw the steepest falls this week, dropping 29.97%. Finally, the Baltic Panamax Index was the best performer in the broader market with a growth of 2.28% over the last week.

The Trading Statistics supplied by KCG Holdings, Inc. provide details of the trading performance of each shipping stock and analyze the market's trading momentum and trends for the week and year-to-date

The objective of the Capital Link Maritime Indices is to enable investors, as well as all shipping market participants, to better track the performance of listed shipping stocks individually, by sector or as an industry. Performance can be compared to other individual shipping stocks, to their sector, to the broader market, as well as to the physical underlying shipping markets or other commodities. The Indices currently focus only on companies listed on US Exchanges providing a homogeneous universe. They are calculated daily and are based on the market capitalization weighting of the stocks in each index. In terms of historical data, the indices go back to January 2, 2005, thereby providing investors with historical performance.

There are seven indices in total; the Capital Link Maritime Index comprised of all 45 listed shipping stocks, and six Sector Indices, the CL Dry Bulk Index, the CL Tanker Index, the CL Container Index, the CL LNG / LPG Index, the CL Mixed Fleet Index and the CL Maritime MLP Index.

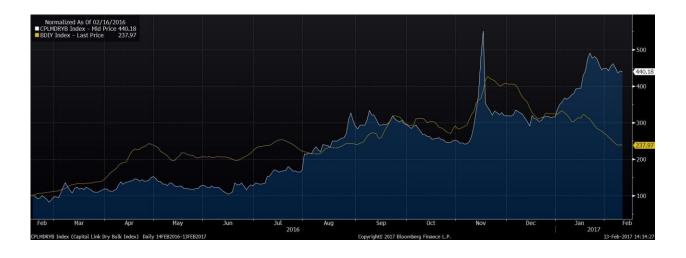

The Index values are updated daily after the market close and can be accessed at or at or www.MaritimeIndices.com. They can also be found through the Bloomberg page "CPLI" and Reuters.

Weekly Market Report

Market Analysis

With the Baltic Dry Index now at levels fairly on par with those at the start of the year and the market looking poised to see a boost during the current month which could help it reach similar levels to those relative highs noted back in November, it is only reasonable that we have started to see Buying interest amass in the market. Activity in the secondhand market for dry bulk vessels has been heavy for some time now, though relatively little of this had been translated over to prices since the start of the year, with only a 10% average increase having been noted thus far. Things now seem to be on the verge of a shift, with a considerable number of deals now emerging with price indications which definitely point towards a strengthening sentiment amongst buyers and a re-emergence of appetite for speculation. So as things stand now the market seems to be set on an upward course, putting many in the market at ease as they finally see some positive "images" emerging from this once battered market.

Things aren't set in stone however. Sure the market has been showing a considerable path towards some sort of recovery and signs from the commodities markets have been giving further confidence onto those who are looking to find the "clear skies and favourable winds" at the end of the "perfect storm". Prices for many of the main industrial commodities such as iron ore and coal have continued to climb as demand holds firm, while even steel, a commodity which has more than any other felt the pressure from the supply glut, has managed to show a favourable face this year. At the same time a number of recent policies (or trade bans as is the case of the ban set by China on North Korean Coal imports) have given an extra legging and have allowed for a further boost on the market. All this however is riding on shaky and unstable "wheels", as the recent targets coming out of China's leadership this weekend emphasises. The decision to lower its growth target down to 6.5% for this year may well be part of its continued push to undertake a number of painful reforms so as to kip a lid on risks in its economy as a whole. However it also highlights the increasing fear that many in its leadership have towards the growing trends globally as to increased protectionism and a closing of boarders to commerce, something that would surely take its toll on an economy still primed to a considerable extent towards export led economic growth. At the same time things seem to be equally off balance in India, the other main economy in the Pacific which many have come to rely on as a driver for economic growth. Recent issues created by the sudden "demonetisation" policy, along with a longer trending shift in its banks' business lending strategies leaves for poor indicators as to its economies overall prospects moving forward. For the time being however, things seem to be going on the "right" path.

What's less worrisome for most in the dry bulk shipping is that we are seeing positive trends on the demand side, during leg of "heavy" newbuilding deliveries and given that after the summer period we not only expect to see a considerable slowdown in the number of new vessels entering the market we also expect that regulations will play their part in pushing a new wave of vessels towards the breakers' yards. Therefore, common sense would have it that even in the case whereby demand starts to stall once again, supply should be even better placed to counter the negative effects and keep the market "in the black". Nothing should ever be taken for granted in this industry, however for the moment things to be pushing towards a positive outcome.

Capital Link Shipping Weekly Markets Report

SHIPPING MARKETS

Dry Bulkers – Spot Market

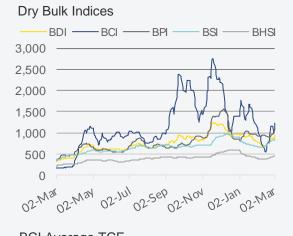

Capesize - Things started off this past week relatively slowly, with rates starting to note some slight drops on previous levels. This was more so to be seen in the Atlantic were rates noted a fairly strong retreat. The Pacific was holding at more balanced levels, while towards the end of the week and with a number of mid-March cargoes flooding the market the market was set for a turn around in fortunes once more, leaving an after taste of further firming to come over the next couple of days.

Panamax - Improved trading out of ECSA helped pull the market to fairly improved levels. The North Atlantic was quick to follow, while the Pacific provided considerable support to allow for sentiment to improve further. As things stand now, expectations are for further gains to be seen fairly soon and rates to climb on the back of this increase in fresh inquiries being

Supramax - A fairly active week, though not much of what was being seen in volume of fixtures translated into increased hire rates just yet. The pressure has mounted on further rate improvements to be noted both in the Atlantic and Pacific fairly soon, while expectations of a strong demand to emerge from US Gulf during mid-March has left many to hold a bullish view on the rates to come.

Handysize - The positive feel continues to show its presence in the market, with the North Atlantic leading the most recent improvement in freight rates. Things were also looking to be improved in the South Atlantic, while here too there was much support to be seen out of the Far East demand.

Capital Link Shipping Weekly Markets Report

SHIPPING MARKETS

Tankers - Spot Market

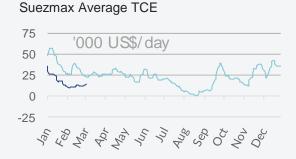

Crude Oil Carriers - With yet another week of slow activity being noted, rates for VLs were quick to note another drop for voyages out of the MEG. With no positive signs to be seen in the MEG the WAF was quick to follow on a similar path, with rates there too on the decline and showing to be under pressure. Things were slightly better for Suezmaxes, with both the WAF and Black Sea/Med showing slightly improved levels thanks to a heavier program for the second half of March. Things were more "mix and match" for Aframaxes, with rates in the North Sea/Baltic showing some gains, while there was also some gains to be seen in the Black Sea/Med region. The MEG and Caribs were still on the decline due to the position lists that have amassed in both regions.

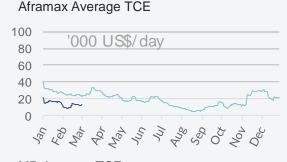

Oil Products - Things where mixed on the product tankers front, with DPP routes showing a slight decline overall compared to last week, while most of the CPP routes especially in the Atlantic were showing good gains thanks to slightly healthier level of fresh enquiries coming in.

SHIPPING MARKETS

Secondhand Asset Values

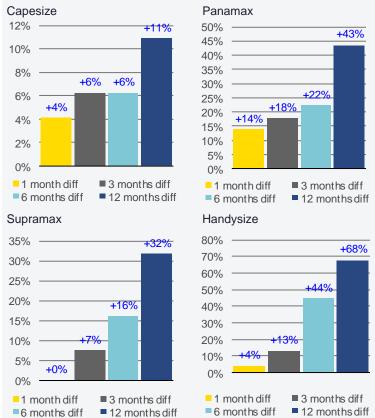

On the dry bulk side, activity keeps gaining pace leading to the recent rise in asset prices that has started to be noted. There is a sense now that with the given improvement in freight rates, buyers will become increasingly bullish and with their sentiment getting ever more bullish we should see a quick increase in price levels over the coming months. At the same time the flow of sale candidates is set to remain fairly steady, with banks and other lenders still looking to offload parts of their portfolios onto the market.

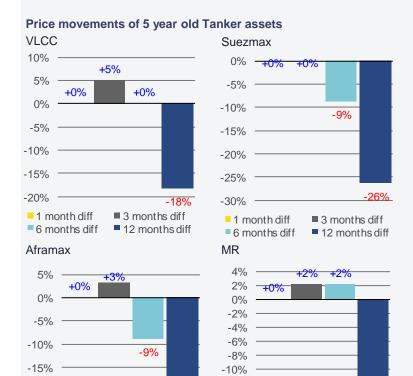

On the tanker side, things remain weak in terms of reported activity, while the softer prices keep the lists of available sales candidates to a bare minimum. There is also the increased uncertainty as to how the freight market will move over the course of the year that is still keeping a cap on buying interest. On the more positive side and with sellers being unmoved by the current quoted prices, further price drops have for the moment been prevented.

Source: Clarkson Research & Astrup Fearnley

Over the past three months there has been a surge of public and private capital raising to fund dry bulk acquisitions. Notable raises have been 1) Eagle Bulk's (EGLE; NC; \$5.41) \$100 million January private placement which was this week deployed for up to nine modern Ultramax vessels, 2) Star Bulk Carriers' (SBLK; Hold; \$10.71) February \$51 million equity raise, 3) Songa Bulk's November \$74 million offering and February \$100 million secondary. We understand there are 4-5 additional private firms actively looking to raise more than \$500 million collectively. If successful in combination with what has already been raised, there could be nearly a billion of new equity capital for secondhand vessels. In the past three months 153 dry bulk vessel were acquired for approximately \$1.8 billion which drove up five-year-old asset values by about 10%, 10-year-old assets by 20%, and 15-year-old assets by 25%. All this with very little of recent capital raising or potential capital raising having yet to be deployed. There does seem to be an increased level of concern that asset values may pause in their upward movement, but relatively small amounts of capital can drive material movements in prices. While not a problem in itself, the risk is that the gap between secondhand and new vessel prices close to the point at which ordering again makes sense, particularly as owners look to prepare for the new emission regulations. Currently average five-year-old-vessels are about 65% of new vessels prices. Typically, when the ratio rises to 70% ordering activity picks up. That does leave some room for further inflation, but with eager shipyards, more capital and higher asset prices may have a nasty side effect.

Pacific Promise

An Asian energy powerhouse in the spotlight

Indonesia has attracted significant attention in the energy markets lately. This week, King Salman bin Abdulaziz Al Saud of Saudi Arabia arrived in Indonesia for an official state visit, the first visit of a Saudi king since 1970. It is expected that the two governments will sign several memoranda of understanding related to Saudi investments in Indonesia's energy sector. Indonesia is also courting other OPEC members. In December 2016, Indonesia's President Widodo visited Tehran to seek out partnerships with Iran in the oil and gas industry. Indonesia, which re-joined OPEC in December 2015, despite being a net-importer of crude oil, is clearly seeking to modernise its energy infrastructure amid struggles to meet rising domestic demand. The country is already a major force in the tanker market, in particular in the Pacific Basin. Significant investments from OPEC members in Indonesia's downstream infrastructure projects will further boost tanker traffic around the fourth largest country in the world, an archipelago of 17,000 islands inhabited by 260 million people.

Indonesia's oil industry dates back to 1885, when a 20-year old Dutchman Aeilko Jans Zijlker, a former tobacco planter struck oil in North Sumatra. Zijlker formed a company, which eventually became the Royal Dutch/Shell Group. In 1965, Shell sold all its assets in Indonesia to Pertamina, Indonesia's state oil company. At that time, Indonesia produced 486,000 b/d of crude oil. It was the largest Asian oil producer representing more than 50% of the continent's output. Indonesia's crude oil production peaked in 1977 at 1.7 million b/d. By that time, China had already overtaken it as the largest producer in Asia. Between 1977 and 1998, Indonesia's crude oil output remained between 1.5 and 1.7 million b/d. After 2000, Indonesian production started to decline and by 2016 it was reduced to around 850,000 b/d. Over the same period domestic oil demand has increased rapidly, from 1.1 million b/d in 2000 to 1.6 million b/d in 2016. This demand is satisfied partially by domestic refiners (Indonesia has about 1.1 million b/d of refining capacity) and partially by imports, mostly from regional refining centers such Singapore, India and South Korea.

Despite the fact that Indonesia's oil demand far exceeds its domestic production, it remains a significant exporter of crude oil. Some 60% of Indonesia's crude oil production, much of which tends to be light and sweet, finds its way to various customers in the region (Fig. 1). From 2015 to 2016, China, Singapore and Malaysia increased their purchases from Indonesia, while Japan and Australia reduced their imports. Total exports increased from 427,000 b/d in 2015 to 516,000 b/d last year (+20%). Indonesia's exports are predominantly done on Aframaxes, although moves to China, Singapore and Korea are also occasionally done on Suezmaxes and VLCCs. The rest of Indonesia's crude production is processed in the country. Most of this crude oil is moved seaborne on Aframax tankers to domestic refiners.

Due to the significant discrepancy between oil demand, crude exports and domestic supplies, Indonesia needs to import a growing portion of its crude oil needs (Fig. 2). Indonesia sources its crude oil from a wide variety of countries. Saudi Arabia is the single largest supplier, but West Africa (Nigeria and Angola) are important sources of crude as well. These longhaul trades are predominantly served with VLCCs and Suezmaxes. Within the Pacific Basin, Malaysia and Australia are

Fig. 1: Indonesian Crude Oil Exports by Destination

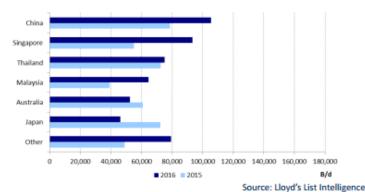

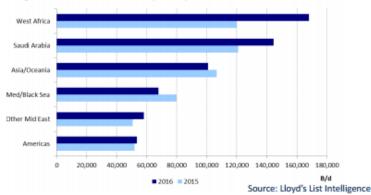

Fig. 2: Indonesian Crude Oil Imports by Load Area

the main suppliers and Aframaxes are the carrier of choice. Occasional cargoes from the Eastern Mediterranean are mostly shipped on Suezmaxes.

Indonesia has ambitions to increase crude oil production as well as refining capacity. The country's history and geography seems to suggest that future increases in production could very well find its way into the export market, while more refining capacity especially if financed by Middle Eastern oil producers such as Saudi Arabia or Iran - will likely come with long term crude oil supply contracts. Both of these developments will be supportive of the crude oil tanker market. To the extent that refining capacity growth falls short of product demand growth, product tankers will benefit as well.

VLCC

The VLCC market commenced under strong negative pressure this week with an early S-Oil cargo having received several offers and ultimately setting a fresh YTD rate low. However, despite ongoing talk of sluggish Middle East demand, the tally of fixtures there inched up to a three-week high of 29 (+12%, w/w), which exceeds the 52-week average by 10%. Elsewhere, the Atlantic basin experienced a surge in demand in all key load regions: the West Africa market observed nine fresh fixtures (+50% w/w and a six-week high) while 8 fixtures materialized for loading in the Caribbean and Latin America and five materialized for loading in the North Sea region. After the S-Oil cargo set a fresh low, rates stabilized on the sustained demand.

On a combined basis, this week's demand in the Middle East and West Africa and expectations for both regions to remain active could have proven supportive of rates – even if modestly – independently of supply

Capital Link Shipping Weekly Markets Report

SHIPPING MARKETS

Tanker Market - Weekly Highlights

However, supply was ample given usual psychological factors. throughout the week following last week's buildup of positions and remains both elevated and heavily comprised of disadvantaged units. On this basis, we expect that rate support will remain elusive during the upcoming week. There are presently 38 units available for loading in the Middle East through the end of March's second decade. Against this, we expect that there will be an additional 16 Middle East cargoes through the same space of time and 8 additional draws to service West Africa demand, implying a surplus of 14 units. This, however, compares with a week-ago estimate of 16 surplus units at the close of the month's first decade, which furthers our thesis that the market has little downside potential in the immediate near-term.

Middle East

Rates to the Far East lost 7.5 points to conclude at ws60 with corresponding TCEs declining by 20% to ~\$25,074/day. Rates to the USG via the Cape shed 1.5 points to conclude at ws31. Triangulated Westbound trade earnings fell 6% to ~\$34,891/day.

Atlantic Basin

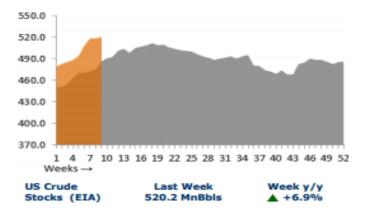

Rates in the West Africa market lagged those in the Middle East and the WAFR-FEAST shed 4.5 points route to conclude ws63. Corresponding TCEs were off by 12% to ~\$28,009/day. Caribbean market tested a fresh low early this week and despite being followed by an influx of fresh fixtures rates failed to pare the earlier losses. The CBS-SPORE route shed \$100k to \$4.3m lump sum and is likely to hover around this level through the upcoming week.

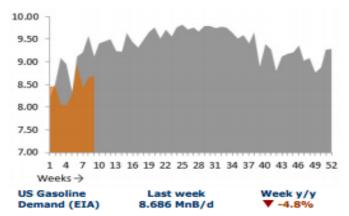

Suezmax

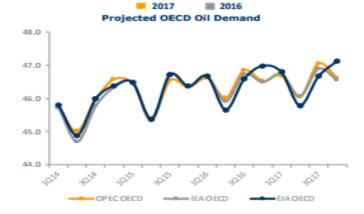

The West Africa Suezmax market observed further modest rate gains Regional availability remains tight on light availability replenishment, as demand for units in alternative markets has been active. The weekly tally of regional fixtures rose by two to nine, though this remains 23% below the 52-week average - and the 4-week moving average remains 15% below the 52-week average. Light demand for Suezmaxes in the region follows strong recent coverage by VLCCs, which leaves fewer Suezmax cargoes available. Further aiding rates, however, loadings of some export streams have been delayed while a number of March cargoes remain uncovered, raising optimism by owners for the supply/demand ratio to remain in their favor in the near-term. Additionally, reports indicate that a small number of cargoes for loading from storage facilities at South Africa's Saldanha Bay will materialize thanks to a flattening contango structure in crude futures markets which makes holding these cargoes uneconomical. the corresponding positive impact on Suezmax fundamentals, however, we note that one VLCC fixture was reported for South African loading this week, which implies that further demand in the region will be Rates on the WAFR-UKC route gained 2.5 points to conclude at ws87.5. Elsewhere, rates in the Caribbean market slipped this week with the CBS-USG route shedding 8.3 points to conclude at ws86.7, as a function of by softer Aframax rates and lighter Suezmax inquiry.

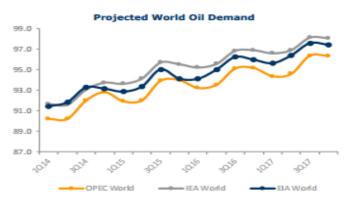

Aframax

The Caribbean Aframax market commenced with rates continuing their retreat from last week's highs. Strong demand materialized on Monday and Tuesday, however, which quickly tightened positions, leading to a fresh rebound. Rates on the CBS-USG route lost 12.5 points early during the week to a low of ws130 before rebounding to the ws135 level

Capital Link Shipping Weekly Markets Report

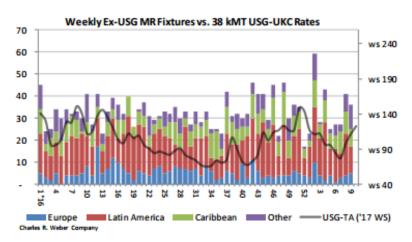

Tuesday, March 7, 2017 (Week 10)

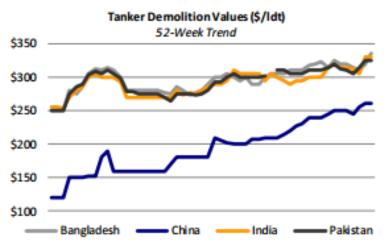

SHIPPING MARKETS

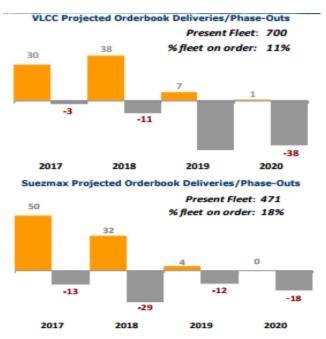

Tanker Market - Weekly Highlights

at the close of the week, representing a 7.5-point loss for the week. As demand levels pared back sharply after mid-week, we expect that the appearance of fresh units on position lists on Monday will be sufficient to see rates break into negative territory.

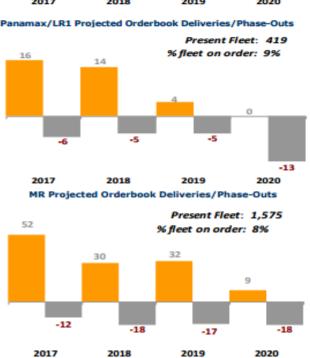

Rates in the USG MR market continued to firm this week as available positions remained tight even as fresh demand eased from last week's The recent tightness has been prompted by ongoing discharge delays at ECMex and elsewhere in Latin America, a rising share of USG fixtures being bound for medium and long-haul destinations and a decline in USAC arrivals following record PADD1B gasoline inventories at mid-February. A total of 36 units were fixed in the USG this week, off 12% from last week; of these, five were bound for points in Europe (+1 w/w), 20 were bound for points in Latin America and the Caribbean (-9, w/w) and the remainder were for alternative destinations or have vet to be determined. Rates on the USG-UKC route rose 17.5 points to conclude at a ws122.5 - the highest rate since 4 Jan. The USG-CBS route rose \$95k to a YTD high of \$525k lump sum. Two-week forward availability concludes the week up 8% to 43 units, though we note that the front-end of this list remains markedly tighter on the ongoing delays. Until these units berth and return to certain availability, rates appear likely to remain elevated with any additional gains likely to be guided by the extent of fresh inquiry.

VLCC	– 29,000	29,500	= 30,500	- 32,500

Tanker Comment: Oil majors reported poor earnings for the 4Q 2016, although many oil executives feel optimistic about the forthcoming period. Their feeling is based on the stabilized oil prices and the measures implemented over the past three years in order to cut costs. In the tanker market this week's surging US exports seem to have had a bigger impact on global oil market as outbound shipments hit more than 1.2m bbl/day. Today WTI Crude Oil reached 54.09 USD/bbl while Brent Crude is at 56.65 USD/bbl. In the period sector, rates continue to fall. 1-yr TC rates for Suezmax are floating around \$20,500/pdpr while VLCC for the same period can achieve about \$29,000/pdpr.

WET FFA					
	TD3	TD7	TC2	TC6	
1 MOS	32,300	14,200	6,600	7,900
